

SVAM earns CMMC RPO certificate

New York, NY - November 16, 2022 - SVAM International Inc., one of the leading digital transformation firms and cybersecurity services providers, has been approved as a Registered Provider Organization (RPO) by the Cybersecurity Maturity Model Certification (CMMC) Accreditation Board, enabling the firm to provide consulting services to Department Of Defense (DoD) contractors and suppliers seeking to obtain the mandatory new CMMC.

"We are excited to advance within the CMMC ecosystem and provide CMMC readiness services to DoD contractors for CMMC" said [Kiran Bhujle](#), Cybersecurity Practice Leader. "It is by far the most comprehensive readiness initiative we have embarked on that will help protect the DoD's sensitive data and play a critical role in protecting our nation against cybersecurity threats from adversaries."

The new DoD standard will require its contractors and suppliers that store, process, or exchange DoD data (federal contract information (FCI) or controlled unclassified information (CUI)) to comply with CMMC. The CMMC requirements could appear in DoD solicitations as early as May 2023, organizations that have achieved the certain CMMC Level, assessed, validated and certified from the CMMC-AB, will be considered for the contract award.
